- [Additional NC State Rules and Regulations](#)

#### Course Information

- **Instructor:** Dr. Bevin Maultsby (she/her/hers)
- **Office:** SAS Hall 3230
- **Office Hours:** [Appointment scheduler](#)
- **Course Modality:** This course is an online, asynchronous Distance Education course.
- **Course Website:** Access the course through [NC State WolfWare](#).

#### How to Reach Me

Even though the course is asynchronous and online, I enjoy interacting with students and want you to feel comfortable contacting me throughout the semester. Please read the section below for the best way to reach me:

- Please ask general course questions and mathematical questions on Piazza (our course forum); you can be anonymous to your classmates. You can use the private message feature to send me a direct message through Piazza.
- Please use the Email Me forum in Moodle to send me a direct message. This message is not visible to your classmates.

- My email address is [bmaults@ncsu.edu](mailto:bmaults@ncsu.edu). However, it is possible that if you email me directly, you will be instructed to contact me through a different channel. This helps me keep my messages organized and reply more efficiently. I aim to respond to messages within 1-2 business days. If more than a week has gone by without a response, please let me know as I must have missed your message.
  - You are always welcome in my **Office Hours**, which are generally arranged online using this [appointment scheduler](#). This calendar generally shows appointments for this week and next. If there are no suitable times over the next two weeks, please send me a message with at least three suitable times for you; you may also suggest in-person meeting times between 10am and 3:30pm. *You may be required to log in to your [NC State gmail account](#) in order to see my appointment calendar.*
- 

## Course Description

(3 credit hours) Fundamental theorems on continuous functions; convergence theory of sequences, series and integrals; the Riemann integral. Credit for both MA 425 and MA 511 is not allowed.

Prerequisite. MA 341. MA 225 is desirable but not required.

---

## Learning Objectives

MA 511 is an introduction to mathematical analysis. Upon successful completion of this course, students will be able to:

1. **Explain the foundational concepts of real analysis**, including set theory basics, limits, completeness, continuity, differentiability, integrability, and convergence of functions and sequences.
2. **Construct clear and rigorous mathematical proofs**, using common methods such as direct proof, contradiction, contrapositive, and induction, with attention to logical structure and written clarity.
3. **Apply theorems precisely and appropriately** to analyze and compare the behavior of sets, sequences, functions, and series in one-variable calculus.
4. **Interpret and connect definitions and major results** in analysis to support problem-solving and deeper conceptual understanding.
5. **Communicate mathematical arguments effectively**, demonstrating fluency with the language, notation, and conventions of analysis.

We will focus some attention on learning to write mathematical proofs. Proofs will be graded not only for content but also for writing and style. (A mathematically correct proof which is poorly written may receive a low grade.)

---

## Course Structure

In general this course will consist of three interactive video lectures per week with a weekly quiz, written homework assignments (approximately every two weeks), and three tests.

## Lecture Materials

Our lectures are contained in H5P modules on Moodle. During each lecture activity, you will be asked the equivalent of “in-class quiz questions.” These questions do not count towards your course grade, but give you a way to assess how well you are following the lecture. My hope is that you will find that the questions highlight major concepts and improve your understanding—they were written to guide you, not to test you. Some of these questions pop-up automatically, while others must be clicked on (typically look for a purple indicator or open circle both on the slides and along the progress bar).

- During “Interactive Video” lectures, you only get one attempt on these lecture questions—please read each one carefully. You cannot retry the lecture quiz questions. Remember that the questions are not graded (and I do not look at your scores). Just do your best!
- During “Interactive Slides” lectures, you may reattempt some questions, however you cannot reattempt summary questions.

I recommend you only begin a lecture if you can fully commit your attention to it. Note that you can pause and return at a later time. You can also speed up the pace of the lecture (up to 2x speed).

You must complete the lecture summary questions to see the Moodle quiz covering lecture material. Thus I recommend that you try to complete all lectures by each Friday at the latest.

Each lecture has slides and bookmarks to allow you to quickly reach content you wish to review.

*You may watch the videos directly in YouTube if you prefer. However, you must answer the pop-up questions in Moodle to get points to unlock the weekly quizzes. Thus you should not exclusively watch the course content in YouTube.*

## Student Choice Lecture

The required lectures cover the fundamental ideas of real analysis on  $\mathbb{R}$ .

Since many students who take MA 511 are graduate students in other disciplines, you may be interested in applying real analysis in various situations. Thus I have prepared eight additional topics from the textbook.

Throughout the semester, you must choose one of these “Student Choice” lectures. You will watch the lecture and complete the required assignment—there will be no examination questions on these topics. These lectures have been interspersed throughout the weeks based on when they are most relevant to the required material; however, the activity is not due until the end of the last week of class. Here is a list of these topics, together with my recommendations:

Choose one of the lectures below and complete its assignment by the end of the semester. The "Recommended for" column notes typical audiences and any prerequisites.

**Table: Chart of Student Choice Lectures**

<b>Section</b>	<b>Title</b>	<b>Recommended for those interested in...</b>
2.3	Markov Chains	Statistics / Probability; Economics (requires linear algebra / eigen theory)
2.7	Quadratic Map	General math — Dynamical Systems
Posted supplement	Compact Sets	General math — Analysis and Topology
4.4	Newton's Method	Math education
5.4	Integral Equations	General math — Differential Equations
5.5	Calculus of Variations	General math — Analysis
10.1	Discrete Random Variables	Statistics / Probability
10.2	Coding Theory	Statistics / Probability; Computer Science

If you see a section or topic in a Real Analysis I/Advanced Calculus I book which has not been mentioned but which piques your interest, you may request a different topic before the last month of class. I will see if the topic is suitable and prepare an activity for you (or you can suggest good problems!).

---

## Communication and Getting Help

### Forum

We will use **Piazza** for class discussion and homework questions. You are encouraged to use Piazza to discuss concepts and homework with discretion-hints and suggestions are okay, but full solutions will be deleted. You can post under your name or you may be anonymous to your classmates; however, the instructor will be able to see who you are. Please be respectful of your fellow classmates' ideas and attempts. If you have a math question you are not sure should be a public post, it is better to send me a direct message as a private post on Piazza.

Enroll in this class Piazza through the Piazza link near the top of Moodle.

Request: when asking a question about a specific item (like an item in Moodle), please include a direct link to that item (e.g. the Moodle url). It helps everyone answer your question a lot faster.

### Email

Please be sure to see the beginning of this syllabus for the best ways to contact me.

Contact me for confidential and private discussions about grades, scheduling office hours, etc. Please include MA 511 in the subject line. In general, I may not respond to messages outside of business hours (M-F, 9am-5pm), and it may take 24-72 hours for me to respond to an message. Math questions are generally best asked in office hours or on our forum, not by email.

---

## Homework

There are two types of homework in this class: Moodle quizzes (completed entirely in Moodle) and written homework (submitted to the grading platform Gradescope through Moodle). You are responsible for tracking quiz and homework due dates.

### Quizzes

There are weekly ~45-minute quizzes on Moodle which become available following completion of the lectures. Quizzes will require you to demonstrate knowledge of definitions and theorems. You may be asked to provide specific statements and will be evaluated based on correct and precise wording; using a computer is likely more convenient than using a phone for the quizzes. Although the quizzes are open notes/open book, your success in the course is closely linked to your familiarity with the terminology—heavy dependence during the quizzes on notes/books is discouraged.

# NC STATE UNIVERSITY

On most quizzes you have two attempts per problem and one overall submission (so do not submit the entire quiz until you are done with each question). If your first attempt on a question is not correct, you can click on your answer and reattempt the question.

You can start a quiz, answer a few questions, close your browser, and resume later on a different device. You do not need to complete the quiz in one sitting. You also do not need to formally “submit” the quiz—Moodle will submit it on your behalf at the deadline.

## Written Homework

Homework assignments in real analysis are often challenging and lengthy. You should begin working on them as soon as possible. All homework assignments are posted on Moodle and are due by 11pm (Eastern) on the listed day. Homework will be submitted through Gradescope.

On each homework assignment, you may work in a group (up to 4... 2-3 is ideal). Let me know if you would like to be introduced to other classmates looking for a group, or you can reach out to everyone on Piazza. If you work in a group, be sure to declare all members with the submission by clicking this button: (and only one person should submit).

---

## Test Information

There will be three “midterm” examinations—the final exam is Midterm 3. The exams each test about one third of the course. While they are not written to test earlier material deliberately, as the course progresses some questions will naturally rely on your mastery of earlier topics.

## Test Dates

- Test 1: 2/13-2/18, 90 minutes
- Test 2: 3/11-3/25, 90 minutes
- Test 3: 4/28-5/5, 120 minutes (intended as a 90 minute exam)

## Proctors

All examinations will be proctored through DELTA. You will either take your exam with DELTA, or coordinate remote proctoring with DELTA, according to which situation best describes you:

- If you live less than 50 miles away from Raleigh, NC, then you will take your tests on our campus through the Distance Education Testing Centers. Students should be mindful of closing hours for both Testing Centers, and give themselves plenty of time to complete their exams. For information, please visit [DELTA on-campus testing services](#).
- Those students who live more than 50 miles away from Raleigh, NC do not have to take their tests on NCSU campus. They may use a proctor in their town for testing. The proctor must be approved in advance through DELTA (not the instructor). It can take up

# NC STATE UNIVERSITY

to 1 week to verify a proctor and set up all needed contact info, so please do this early!  
Please visit the remote proctor website at [DELTA remote proctoring](#).

I encourage you to look through DELTA Testing Service's website, especially their [frequently asked questions \(FAQs\)](#).

**Note:** the word *remote* in this context means that you are using a professional testing site (for example, a testing center, a local library, a college, etc.) other than DELTA. Remote testing does not mean testing at home.

## Quick Links

Please sign up your preferred time and date as soon as possible. Time slots fill up fast:

You may reschedule an exam appointment directly with DELTA using the link above. You do not need to contact the instructor for permission, provided that your new appointment is scheduled within the exam's posted date range.

## DELTA and exam links

- [Your Final Exam Schedule](#)
- [On-Campus Testing \(DELTA\)](#)
- [Off-Campus Proctoring](#)
- [Reschedule with DELTA](#)

## Calculators

You may use scientific calculators on exams. These calculators must not have calculus capabilities (differentiation, integration), CAS (computer algebra system) capabilities, or access to the internet.

There are descriptions and examples of calculators here: [Calculator Guidelines](#). If you are on-campus, you may rent a suitable calculator from the NC State Libraries: [Calculator rentals at NC State Libraries](#).

---

## Classroom Expectations

1. **Course Structure:** This is an online class; you are responsible for your own learning and for pacing yourself within course guidelines.
  - Watch the video lectures scheduled each week and follow the Course Calendar.
  - Track all due dates in Moodle and on the Course Calendar.
  - Complete all assignments in a timely fashion.
  - Post your math questions in the course forum for discussions and Q&A.
  - Optional: attend live sessions.

# NC STATE UNIVERSITY

- 2. Communication and announcements:** Please check your email, the course forum, and the Moodle site regularly. All announcements sent by email will also be saved under Announcements on Moodle. You are responsible for knowing the content of course emails.
- 3. Respect and professionalism:** Treat everyone in class (students and instructor) with respect and courtesy. Be active and prepared in any live sessions. Come to office hours ready to ask questions and communicate with others.
- 4. Accountability:** You are responsible for resolving any confusion about assignments, due dates, exams, accommodations, etc., in a prompt manner.
- 5. Academic integrity:** Do not submit work that is not yours. It is understood that your name on any assignment indicates your adherence to the NC State Honor Pledge: "I have neither given nor received unauthorized aid on this test or assignment."
- 6. Exam device policy:** Review the permitted items before each exam. Keep phones and other forbidden devices powered off and stored away during exams to avoid accidental use.

## Student Success

Student well-being is important to success at NC State. Every student, faculty member, and staff member enriches the community through varied perspectives, knowledge, and experience. Our classroom should be a space where every student is respected and heard.

In an effort to affirm and respect the identities of all students in the classroom and beyond, please contact me if you wish to be referred to using a name and/or pronouns other than those listed in the student directory.

I welcome any suggestions you have for making our classroom more welcoming.

---

## Grading

### Grade Weighting and Numerical Conversion

Your grade will be determined by the following breakdown:

- Lectures[1], 0%
- Written Homework, 20%
- Quizzes, 20%
- Midterm 1, 20%
- Midterm 2, 20%
- Midterm 3, 20%

# NC STATE UNIVERSITY

[1] *Due to Moodle incorrectly storing some lecture scores, your lecture scores do not count towards your course grade. However, you are still expected to earn credit for each lecture to access the relevant quiz.*

Grades are tracked in real-time in the Moodle **Gradebook**.

## **Conversion from Numerical Grade to Letter Grade**

A student's numerical average will be converted to a letter grade as follows (do not expect any additional rounding, extra credit, or curves):

Standard Conversion Table

<b>Grade</b>	<b>Range</b>
A+	97-100
A	93-96.99
A-	90-92.99
B+	87-89.99
B	83-86.99
B-	80-82.99
C+	77-79.99
C	73-76.99
C-	70-72.99
D+	67-69.99
D	63-66.99
D-	60-62.99
F	0-59

## **Requirements for Credit-Only (S/U) Grading**

In order to receive a grade of S, students are required to take all exams, complete all assignments, and earn a grade of C- or better. Conversion from letter grading to credit only (S/U) grading is subject to university deadlines. Refer to the Registration and Records calendar for deadlines related to grading. For more details refer to [REG 02.20.15 - Credit-Only Courses](#).

It is the student's responsibility to check if an S grade gives progress towards their degree(s).

## Requirements for Auditors (AU)

Information about and requirements for auditing a course can be found at [REG 02.20.04 - Audits](#).

## Policies on Incomplete Grades

### NC State Policy

At the discretion of the instructor, students may be given an IN grade for work not completed because of a serious interruption in their work not caused by their own negligence. An IN must not be used, however, as a substitute for an F when the student's performance in the course is deserving of failing. An IN is only appropriate when the student's record in the course is such that the successful completion of particular assignments, projects, or tests missed as a result of a documented serious event would enable that student to pass the course.

If an extended deadline is not authorized by the instructor or department, an unfinished incomplete grade will automatically change to an F after either (a) the end of the next regular semester in which the student is enrolled (not including summer sessions), or (b) the end of 12 months if the student is not enrolled, whichever is shorter. Incompletes that change to F will count as an attempted course on transcripts. The burden of fulfilling an incomplete grade is the responsibility of the student. See the university policy on incomplete grades: [REG 02.50.03 - Grades and Grade Point Average](#).

---

## Course Schedule

The course schedule is tentative and subject to change. Adjustments may be made to accommodate the pace of the class and unforeseen circumstances. All major changes will be announced in class and posted on Moodle.

## Important Dates

For holidays and other university closures, please consult [the general NC State Academic Calendar](#).

Your final exam schedule is already determined; find it here: [NC State Final Exam Calendar](#). You are responsible for reviewing your final exam sessions to arrange a suitable time for this course.

## List of Topics

Here are the major topics of MA 511, with the approximate regular-semester time allocated to each:

- **Part I: Sets and Sequences (1/3 of the semester):** Logic and proof writing; sets and functions; bounded sets, supremum and infimum; Nested Interval Property; cardinality and density; open and closed sets; the Cantor set; sequences and convergence; limit theorems; Cauchy sequences; subsequences; Monotone Subsequence Theorem; Monotone Convergence Theorem; Bolzano–Weierstrass Theorem.
- **Part II: Functions — Continuity, Integrability, Differentiability (1/3 of the semester):** Continuous functions; properties of continuous maps on closed intervals; partitions, lower and upper sums, and the Riemann integral; integrable discontinuous functions and measure perspective; improper integrals; the derivative; Mean Value Theorem; Fundamental Theorem of Calculus; inverse functions.
- **Part III: Sequences and Series of Functions (1/3 of the semester):** Sequences of functions; pointwise and uniform convergence; limit theorems for uniform convergence; sup norm; introduction to metric spaces; contraction mapping theorem; series of real numbers; Weierstrass M-test; power series; Taylor's theorem; Fourier series definitions, examples, and convergence.

## Course Continuity

To ensure course continuity, changes made to the method of instructional delivery, course structure, course schedule, number of assignments, grading or other aspects of the course after the start of the term will be communicated to all students in written form (e.g., by an instructor announcement) when course changes are implemented.

---

## Additional Information

### Student Expenses

#### *Recommended book*

Not required: *Fundamental Ideas of Analysis* by Michael Reed, 1st edition. ISBN: 9780471159964.

We will cover all or parts of Chapters 1–6 and 9. Topics will be the real number system, functions and limits, topology on the real line, continuity, differential and integral calculus for functions of one variable, infinite series, uniform convergence, and Fourier series.

#### *Optional Text Supplements*

There are free online resources for learning Analysis I, and many students have completed MA 511 successfully without purchasing the textbook. In addition to the recommended book, you may find the following books helpful

- Understanding Analysis by Stephen Abbott On Reserve at: D.H. Hill Course Reserves. This book is one of my favorites, it's very readable yet still rigorous. Available online through NC State Libraries here: [NC State Library Catalog - Understanding Analysis](#).
- The Way of Analysis by Robert Strichartz On Reserve at: D.H. Hill Course Reserves. This book is good at building intuition.
- Principles of Mathematical Analysis by Walter Rudin. This is the classic text for learning Real Analysis. If you are not continuing in the subject beyond this semester, it may be too technical for our purposes.

I have linked to some useful texts in the Course Reserves (you can also find these on Moodle): [NC State Library Course Reserves](#).

The first two chapters of Reed are also available in Course Reserves.

### *List of topics*

The beginning of the course will slightly reorder some of the topics compared to Reed (mainly so that we introduce and use the Supremum Property as a foundational axiom). From Chapter 3 onwards, we will follow Reed's ordering.

Relative to the optional book, the order of the sections will be: 1.1 (on your own), 1.4, 1.2, 2.5, 1.3, Supplement on open and closed sets, Supplement on the Cantor set, 2.1, 2.2, 2.4 & 2.6 (both in two lectures), 3.1, 3.2, 3.3 (two lectures), 3.5, 3.6, 4.1, 4.2 (two lectures), 4.5, 5.1 (two lectures), 5.2, 5.3, 5.6, 5.7, 6.2, 6.3, 6.4, 4.3, 9.1, 9.2, 9.3.

### **Late Assignments**

If you are having a busy week, please let me know as occasional extensions are acceptable. Unless we have discussed an extension, late homework shall be accepted up to five days late with a penalty of 5% per day (e.g., turning a Monday assignment in on Wednesday incurs a 10% penalty, a Friday assignment handed in on Monday incurs a 15% penalty). Be sure to begin each assignment early.

In general, I will grant extensions of up to a week so long as they are requested in advance of the due date. If you find you repeatedly need extensions, then we should meet on Zoom to discuss how to work effectively in this course.

Assignments submitted later than two weeks passed the original due date will not be accepted.

# NC STATE UNIVERSITY

To request an extension or other considerations due to extenuating circumstances, please work with NCSU Class Absence Verification; here is the link to that office: [NC State Absence Verification Process](#)

## **Submission Timing and Availability Policy**

Assignments are due by 11:00 pm on the posted due date. I am happy to help with technical questions, but please note that I am generally only available for troubleshooting until 5:00 pm on due dates.

To reduce stress and avoid last-minute issues, I strongly encourage you to begin and finish your homework well before 5:00 pm. Starting early gives you time to ask questions and ensures that unexpected problems—such as internet outages or system issues—do not interfere with submitting your work on time.

Because last-minute technical problems are often unavoidable but difficult to resolve after hours, extensions cannot be granted for issues that arise in the evening. Moodle access logs are reviewed when extension requests are submitted, and if the logs show that the homework was first accessed on the due date, an extension will generally not be possible.

In short, planning ahead is the best way to protect your work and your grade. Summary:

- Due time: 11:00 pm on the listed due date
- Best practice: aim to complete work before 5:00 pm
- Extensions: generally not available if work is first accessed on the due date.

For longer-term, recurring, or more serious illness or other interruptions to your participation in this class, you should reach out to your instructor as soon as you can.

## **Late Examinations**

*Excused absence.* If an exam is missed with an excused absence (that is, for a university-approved reason with supporting documentation), then a make-up test will be scheduled individually. The make-up test may contain different questions and be assessed differently than the regular test. Documentation for an excused absence must be provided within 1 week of the missed class. All absences that require a make-up exam or other special accommodations must go through the NC State University absence verification process. Here is the link to that office: [NC State Absence Verification](#).

*Failure to schedule.* You must schedule exams in a timely fashion to guarantee that you will be able to take them. It is the instructor's discretion whether a make-up exam will be allowed if you are not able to schedule an exam appointment within the selected time frame. If the instructor approves a make-up exam, there may be a 10% penalty on that exam. The make-up test may contain different questions and be assessed differently than the regular test.

# NC STATE UNIVERSITY

*Other absences.* If an exam is missed for an unexcused absence, that exam will be given a score of 0.

## **Attendance**

Since this course is an asynchronous online course, there is no daily attendance. Instead, each student's participation in Moodle is tracked to check for regular activity. For complete attendance and excused absence policies, please see Attendance Regulations ([NCSU REG 02.20.03](#)).

## **Academic Integrity**

Students are required to comply with the university policy on academic integrity found in the Code of Student Conduct ([NCSU POL11.35.01](#)). Your submission of any exam indicates "I have neither given nor received unauthorized aid on this test or assignment." Violations of academic integrity will be handled in accordance with the Student Discipline Procedures ([NCSU REG 11.35.02](#)).

Posting any course material to websites like Chegg, ChatGPT, and Course Hero is a violation of copyright law and course policy and is strictly prohibited. Violations of this policy will be reported to the [Office of Student Conduct](#).

- Tests: Proctored tests are closed book assessments. You may not consult any internet resources nor receive help from anyone else. Do not share information about the content on the exams with anyone else in the class. See the calculator policy in the Test Information section of this syllabus.
- Homework: You may consult your notes, the textbook, each other, or online resources.
- Forum discussion boards: You are encouraged to discuss mathematical concepts and problems with your classmates. However, you must arrive at your own solutions with your own work. Do not seek nor state final answers on the forum; focus on understanding the concepts.

## **Disability Resources**

Reasonable accommodations will be made for students with verifiable disabilities. In order to take advantage of available accommodations, students must register with the Disability Resource Office at Holmes Hall, Suite 304, 2751 Cates Avenue, Campus Box 7509, 919-515-7653. For more information on NC State's policy on working with students with disabilities, please see the Academic Accommodations for Students with Disabilities Regulation ([NCSU REG 02.20.01](#)).

Students who receive accommodations are responsible for filing those accommodations officially with DRO before the tests occur. It is not appropriate to tell the instructor that you should receive accommodations without going through the official channels. The instructor

will only adjust test conditions after receiving the official Accommodation Letter Notification from DRO. Adjustments are never made retroactively to past examinations.

---

## Digital Course Components

Because of the way our course is structured, students need internet connectivity in order to read course materials and complete assignments. NC State's Office of Information Technology (OIT) provides [technology guidance](#), including requirements and recommendations for computer hardware.

For access to computing hardware, please see the NC State University Libraries [Technology Lending](#) and the general [Library Computing resources](#). There are several computers available for use around campus, including in the [Mathematics Tutoring Center](#).

Digitally hosted course components will include but are not limited to Moodle and Zoom.

## Software

There are several resources available to assist students with technical or computer issues. For technology help, please consult the [Office of Information Technology](#) at NC State University.

Here are some of the primary applications commonly used in online mathematics courses:

- [Moodle and Wolfware](#): Our course is hosted online on Moodle, where you can find the course content, a link to this syllabus, and the gradebook.
  - [Moodle Accessibility Statement](#)
  - [Moodle Privacy Notice](#)
  - [NC State WolfWare Privacy Statement](#)
- [YouTube](#): Course videos are hosted on YouTube.
  - [Use YouTube with a screen reader](#) (from Google).
  - [YouTube Privacy Policy](#)
- [Panopto](#): NC State uses Panopto for video hosting.
  - [Panopto Accessibility Features](#)
  - [Panopto Privacy Policy](#)
  - [Panopto Support](#)
- [Piazza](#): this site hosts our class forum. You will use **Piazza** to ask questions regarding the lecture or homework.
  - [Piazza Accessibility Statement](#)

# NC STATE UNIVERSITY

- [Piazza Privacy Policy](#)
- [Piazza Support Center](#)
- [Google Meet](#): when needed.
  - [Google Meet Accessibility features](#)
  - [Google Meet Security and Privacy](#)
  - [Google Meet Help](#)
- [Zoom](#): when needed.
  - [Zoom Accessibility Statement](#)
  - [Zoom Privacy Policy](#)
  - [Zoom Support](#)
- [Gradescope](#): We will use Gradescope for collecting and returning written work.
  - [Gradescope Accessibility Information](#)
  - [Gradescope Privacy Policy](#)
  - [Gradescope Help Center](#)

You must address the accessibility of these websites for yourself during the course drop/add period.

The instructor is not responsible for ensuring privacy or accessibility of electronic materials that are not required components of the course (e.g., links to supplemental information that is not part of the required reading list). However, the instructor will judiciously consider the privacy, copyright, and accessibility of supplemental links provided to students and warn them of any known issues or concerns in this regard. See Online Course Material Host Requirements ([NCSU REG 08.00.11](#)).

## **Electronically Hosted Components**

Please be advised that live meetings for this course may be recorded for current and potential future educational purposes. By your continued participation in this recorded course, you are providing your permission to be recorded. If you would like for your likeness to be edited out of a recorded video, please contact me and I will edit the video accordingly.

## **Required Statement**

Students may be required to disclose personally identifiable information to other students in the course, via digital tools, such as email or web-postings, where relevant to the course. Examples include online discussions of class topics, and posting of student coursework. All students are expected to respect the privacy of each other by not sharing or using such information outside the course.

---

## Additional NC State Rules and Regulations

### Your rights and responsibilities

Students are responsible for reviewing the NC State University Policies, Rules, and Regulations (PRRs), which pertain to their course rights and responsibilities, including, but not limited to:

- [POL 04.25.05](#) Opportunity and Non-Discrimination Policy Statement
  - [REG 02.20.01](#) Academic Accommodations for Students with Disabilities
- [POL 11.35.01](#) Student Conduct
  - [REG 11.35.05](#) Code of Student Conduct
  - [REG 11.35.02](#) Student Discipline Procedures
- [REG 02.20.03](#) Attendance Regulations
- [REG 02.50.03](#) Grades and Grade Point Average
- [REG 02.20.15](#) Credit-Only Courses
- [REG 02.20.04](#) Audits
- [REG 08.00.11](#) Online Course Material Host Requirements

You may also find additional references at [NC State Office of Equal Opportunity](#).

### Non-Discrimination Policy

NC State University provides equality of opportunity in education and employment for all students and employees. Accordingly, NC State affirms its commitment to maintain a work environment for all employees and an academic environment for all students that is free from all forms of discrimination. Discrimination based on race, color, religion, creed, sex, national origin, age, disability, veteran status, or sexual orientation is a violation of state and federal law and/or NC State University policy and will not be tolerated. Harassment of any person (either in the form of quid pro quo or creation of a hostile environment) based on race, color, religion, creed, sex, national origin, age, disability, veteran status, or sexual orientation also is a violation of state and federal law and/or NC State University policy and will not be tolerated. Retaliation against any person who complains about discrimination is also prohibited. NC State's policies and regulations covering discrimination, harassment, and retaliation may be accessed at

[POL 04.25.05 - Equal Opportunity and Nondiscrimination Policy](#) or [the Office of Equal Opportunity](#)

Any person who feels that he or she has been the subject of prohibited discrimination, harassment, or retaliation should contact the Office for Equal Opportunity (OEO) at 919-515-3148.

## Support

Everyone is encouraged to take care of themselves and their peers. If you need additional support, there are many resources on campus to help you:

1. [Counseling Center](#)
2. [Health Center](#)
3. [Share a Concern](#)
4. [Pack Essentials](#)

## Course Evaluations

ClassEval is the end-of-semester survey for students to evaluate instruction of all university classes. The current survey is administered online and includes 12 closed-ended questions and 3 open-ended questions. Deans, department heads, and instructors may add a limited number of their own questions to these 15 common-core questions.

Each semester students' responses are compiled into a ClassEval report for every instructor and class. Instructors use the evaluations to improve instruction and include them in their promotion and tenure dossiers, while department heads use them in annual reviews. The reports are included in instructors' personnel files and are considered confidential.

Online class evaluations will be available for students to complete during the last two weeks of the semester for full semester courses and the last week of shorter sessions. Students will receive an email directing them to a website to complete class evaluations. These become unavailable at 8am on the first day of finals.

## Required statement

This course engages diverse scholarly perspectives to develop critical thinking, analysis, and debate and inclusion of a reading does not imply endorsement. *This statement is required per [UNC Policy Manual 400.1.6](#), adopted 12/19/2025.*

## Syllabus Modification Statement

Our syllabus represents a flexible agreement. It outlines the topics we will cover and the order we will cover them in. Minor changes in the syllabus can occur if we need to slow down or speed up the pace of instruction.

Per [REG 02.20.07 – Course Syllabus](#), syllabi do **not** constitute an express or implied contract among the student, faculty, or institution. Rather, syllabi serve as a guide for the course.
